Water's Many Places

Find water on Earth and name its form.

2.9 "Obtain information to identify where water is found on Earth and determine whether it is a solid or a liquid."

NAME _____ DATE _____

1 READ AND MARK

Read it twice

YOUR JOB Underline each place where the text says water is found, and circle the word solid or liquid that tells its form there.

From Beach to Mountain

1. At the beach, ocean water rolls over your toes. It is a liquid, so it flows around rocks. A river also carries liquid water toward the sea. Both places hold water on Earth's surface.

2. Far from the beach, a pond may freeze in winter. The ice on top is solid water. It keeps its shape when you pick up a piece. Liquid water may still move under the ice, where it has not frozen.

3. High on a mountain, snow covers the ground. Snow is made of tiny bits of solid water. When the weather gets warm, some snow melts. The melted water is a liquid that runs down the mountain as a stream.

2 ANSWER WITH EVIDENCE

Use the passage

1. Name two places in the first paragraph where water is a liquid.

2. At the pond, what form is the water on top? What form may be under the ice?

3. On the mountain, what form is water in the snow? What form is it in the stream?

3 YOUR TURN

Your own words

Think of a place on Earth not named in the passage where you have seen water. Write two sentences: name the place and tell if its water is solid or liquid, then give a clue that shows how you know.

ANSWER KEY

Water's Many Places

GRADE 2 · 2.9

PART 1 · READ AND MARK

Underline each place where the text says water is found, and circle the word solid or liquid that tells its form there. Accept any marking that follows this job and points at the right text.

PART 2 · ANSWERS

#	QUESTION	ANSWER
1	Name two places in the first paragraph where water is a liquid.	**The ocean and a river.**
2	At the pond, what form is the water on top? What form may be under the ice?	**The ice on top is solid water. The water under the ice may be liquid.**
3	On the mountain, what form is water in the snow? What form is it in the stream?	**Water in the snow is solid. Water in the stream is liquid.**

PART 3 · YOUR TURN (SAMPLE ANSWER)

Water in a puddle on the sidewalk is a liquid. It spreads out and flows when I push it with my shoe.

Accept any place not named in the passage if the form of water and the supporting clue are accurate.
