HOW TO RUN THIS PAGE

Read each question and its choices aloud, then give students time to think and mark their answers. Students show the skill by finding the number that changes by one ten while the ones stay the same, or by reaching 100 from 90.

Students never read directions on this sheet. Read each part's script aloud, then each prompt, giving think time before students mark.

PART 1 · CIRCLE IT

SAY "When you find 10 more, add one ten. When you find 10 less, take away one ten. Listen to each question and circle your answer."

c	For 90, which number is 10 more: 89, 80, or 100?	**100**
