b	4	2	3

Store Vote Graph

HOW TO RUN THIS PAGE

The three stacked dot groups form a simple graph of pretend store votes. Read the item names aloud, then have partners count and share what the graph shows before they mark their answers.

Students never read directions on this sheet. Read each part's script aloud, then each prompt, giving think time before students mark.

PART 1 · COUNT VOTES

SAY "The top dot row shows books, the middle row shows crayons, and the bottom row shows glue. Count each row with a partner. Tell your partner how many children chose that item, then write the number in the box."

- Box 1 (beside 4 dots): **4**
- Box 2 (beside 2 dots): **2**
- Box 3 (beside 3 dots): **3**

PART 2 · READ GRAPH

SAY "Look back at the dot graph. Tell your partner what you notice about the votes. Then listen to each question and circle one answer."

ROW	SAY	STUDENTS CIRCLE
a	Which store item did the most children choose?	**books**
b	How many children chose glue?	**3**

WHAT TO ACCEPT

The boxes should show 4, 2, and 3 from top to bottom. Students circle books, then 3; record any counting or partner support separately.
